EDUCATION

University of British Columbia, BSc Computer Science

Graduation Date: May 2027

- 3.75 GPA, 2x Dean's Honours List, Go Global Scholarship
- Relevant Coursework: Data Structure and Algorithms (A), Object Oriented Programming (A+), Functional Programming (A-), Discrete Math (A-), Relational Databases (A-), Intro to Software Engineering (A-)

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML, CSS, C, C++

Frameworks/Tools: Amazon Web Services, React.js, Next.js, Node.js, GraphQL, SQL, Docker, Git, Figma

EXPERIENCE

Project Manager Intern

April 2025 - Aug 2025

Government of British Columbia

Vancouver, BC

- Led cross-functional Agile development team through ServiceNow portal redesign, facilitating sprint planning, standups, and UX testing
- Delivered data analytics infrastructure by implementing PowerBI and SQL reporting systems from scratch, transforming manual processes into automated insights across multiple departments

Software Developer Intern

Jan 2024 - Aug 2024

UBC CIC X AWS

Vancouver, BC

- Developed end-to-end cloud solutions and fully managed the SDLC from conception to deployment, leveraged stakeholder feedback and iterative testing to ensure continuous improvement
- Engineered end-to-end data processing pipeline using **AWS S3, Glue, Athena, and Appsync**, transforming 30+ years of university funding data into query-optimized format, improving data retrieval efficiency by **45%**
- Architected Lambda query resolvers and Appsync functions in TypeScript to handle data retrieval and frontend communication
- Designed cloud infrastructure for an multi-tenant AI Learning Assistant using **AWS Amplify, Lambda, Cognito, and Bedrock** and implemented authentication, user tracking, and LLM integrations
- Authored technical documentation and provided guidance for scalability, resulting in a **20%** decrease in developer onboarding time

Software Developer Intern

Jun 2023 - Aug 2023

BCharity

Calgary, AB

- Built Web3 charity collaboration platform using **Typescript, React, and Lens Protocol**, integrating decentralized interactions
- Developed responsive React components with Web3 wallet integration, achieving notable increase in user session duration
- Integrated Web3 services with RESTful APIs, including response handling, state management and dynamic routing
- Maintained project timeline by leading team sprints, using Jira and story points to prioritize tasks and ensure on-time delivery

UX/UI Design Intern

Aug 2024 - Present

Aurora Heat

Remote

- Redesigned product pages using data-driven UX principles, increasing **session duration by 17%** and conversion funnel performance
- Collaborated with marketing and development teams to align business goals with user needs and optimize product performance

EXTRACURRICULARS

Small Business Owner, aurorajewelss

Jun 2021 - Present

- Founded and scaled jewelry e-commerce business to 20k+ social media followers, developing marketing and management skills
- Grew sales by 400% through 8-12 hours of creation per week; expanded cross-border market to international sales

Software Developer, UBC BizTech

May 2025 - Present

- Developed BT-Web-V2 application, including refactoring authentication services and implementing five new UI functionalities

VP Design & Development, UBC UXHub

June 2025 - Present

- Led full-stack development of club website from conception to deployment, directed product strategy and technical execution

TECHNICAL PROJECTS

Campus Explorer

May 2025

- Built full-stack React application for querying and analyzing campus data, including an HTML parser integrated with a geolocation API
- Developed a query engine supporting complex filtering operations, while implementing RESTful API endpoints that enable dataset management and visualization capabilities through a responsive frontend

SpectrumAI - Ranking Bias in News

Oct 2023

- Built news bias detection system using GPT-4 API and NLP techniques, featuring a React and Chakra UI frontend that places political bias on a spectrum
